

Ginger Gardiner

Senior Editor, *CompositesWorld*

BIO

Ginger Gardiner, a senior editor at *CompositesWorld*, began writing for *Composites Technology* and *High Performance Composites* as a contributor in 2006. She was hired as senior editor of the now combined *CompositesWorld* publication in 2013. She is a co-author of the textbook *Essentials of Advanced Composite Fabrication & Repair*. Ginger has a degree in mechanical engineering from Rice University and began her career as a technical marketing representative in DuPont's Composites Division for KEVLAR and NOMEX products in aerospace and marine applications.

QUOTE:

"In the composites industry, suppliers are stepping up to help produce personal protective equipment and ventilators, devising new ideas for quick medical shelters and converting solvent production to cleaning/sanitizing supplies. Our industry is very dynamic and we have many innovators who are also thinking long-term about what can be done to be better prepared in the future."
